Statement on Ownership, Management, and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: The Journal of General Physiology, Published monthly at 1230 York Ave; New York 10021 by The Rockefeller University Press, New York 10021. Editor: Paul F. Cranefield, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 2842; sales through dealers, street vendors, counter sales, 0; mail subscriptions 2421. Total paid circulation, 2421; free distribution 59; office use, left-over, unaccounted, spoiled, 362; net press run, 2842. Single issue nearest filing date Sept. 1975. (Signed W. A. Bayless, Director).

INDEX TO SUBJECTS

A

Acetylcholine and membrane receptor in developing rat and chick myotubes, electrophysiological properties of, 327

Acid, ethylenediamine-tetraacetic, and calcium fluxes in dialyzed squid axons, 223

Actin control and myosin control in animal kingdom, distribution of, regulation of muscular contraction, 1

Activation of phosphorylase in frog muscle as determined by contractile activity, 657

Adaptation, dark, and visual transduction, light-sensitive swelling of isolated frog rod outer segments as in vitro assay for, 407

—, light and dark, intracellular recordings from gecko photoreceptors during, 617

—, light, in *Limulus* ventral photoreceptors, effects of intracellular injection of calcium buffers on, 489

—, local, in ventral photoreceptors of *Limulus*, 823

Adenosine monophosphate, dibutyryl cyclic, and PGE_1, inhibition by, human platelet secretion and aggregation induced by calcium ionophores, 561

— triphosphatase, Na-K-, relation of, to acute changes in renal tubular sodium and potassium transport, 209

Aminopyrimidinium, 2,4,6-tri-, (TAP), blockage of gallbladder tight junction cation-selective channels by, 97

—, 2,4,6-tri-, (TAP), effects of, routes of of nonelectrolyte permeability in gallbladder, 117

Amphibian photoreceptors, some, absorption spectra and linear dichroism of, 357

Antagonists, calcium, multiple effects of, on plateau currents in cardiac Purkinje fibers, 169

Avoidance response, house response, and wind responses of sporangiophore of *Phycomyces*, 67

Axons, dialyzed squid, calcium and EDTA fluxes in, 223

—, lobster, selective modification of sodium channel gating in, by 2,4,6-trinitrophenol, evidence for two inactivation mechanisms, 765

Axons, *Myxicola* giant, magnitude and location of surface charges on, 47

— of scorpion eye, photoreceptor, repetitive spikes in, invertebrate eye structure and tetradotoxin, 649

— of squid and *Myxicola*, internal resistivity of, resistivity of axoplasm, 139

Axoplasm, internal resistivity of giant axons of squid and *Myxicola*, 139

—, resistivity of extruded squid axoplasm, 133

B

Barium ions, resolution of potassium ion pump in muscle fibers using, 269

Block, selectivity, and saturation, ionic, in sodium channels, four-barrier model, 535

Blood cells, red. *See* Erythrocytes.

C

Calcium antagonists, multiple effects of, on plateau currents in cardiac Purkinje fibers, 169

— buffers, effects of intracellular injection of, on light adaptation in *Limulus* ventral photoreceptors, 489

—, characterization of effects of Mg^{2+} on Ca^{2+}- and Sr^{2+}-activated tension generation of skinned skeletal muscle fibers, 427

— and EDTA fluxes in dialyzed squid axons, 223

— ionophores, human platelet secretion and aggregation induced by, inhibition by PGE_1 and dibutyryl cyclic AMP, 561

Cardiac Purkinje fibers, multiple effects of calcium antagonists on plateau currents in, 169

Cells, frog taste, membrane resistance change of, in response to water and NaCl, 735

—, hair, responses of, to statocyst rotation, 507

—, red blood. *See* Erythrocytes.

Cells, visual, in lateral eye of *Limulus in situ*, properties of, extracellular recordings, 303
Cellular, extra-, recordings, properties of visual cells in lateral eye of *Limulus in situ*, 303
—, intra-, injection of calcium buffers on light adaptation, effects of, in *Limulus* ventral photoreceptors, 489
—, intra-, recordings from gecko photoreceptors during light and dark adaptation, 617
Channel, sodium, gating in lobster axons, selective modification of, by 2,4,6-trinitrophenol, evidence for two inactivation mechanisms, 765
Channels, gallbladder tight junction cation-selective, blockage of, by 2,4,6-triaminopyrimidinium (TAP), 97
—, sodium, ionic selectivity, saturation, and block in, four-barrier model, 535
Chorda tympani fibers, macaque monkey, response properties of, 781
Contractile activity, activation of phosphorylase in frog muscle as determined by, 657
Contraction, muscular, regulation of, distribution of actin control and myosin control in animal kingdom, 1
Coupling of salt and water transport, models for, proximal tubular reabsorption in *Necturus* kidney, 671
Cross-reinnervation, effect of, on physiological parameters and on properties of myosin and sarcoplasmic reticulum of fast and slow muscles of rabbit, 811
Cyclic AMP, dibutyryl, and PGE_1, inhibition by, human platelet secretion and aggregation induced by calcium ionophores, 561

D

Dark adaptation and visual transduction, light-sensitive swelling of isolated frog rod outer segments as in vitro assay for, 407
— and light adaptation, intracellular recordings from gecko photoreceptors during, 617
Dialyzed squid axons, calcium and EDTA fluxes in, 223
Diaminetetraacetic acid, ethylene-, and calcium fluxes in dialyzed squid axons, 223
Dibutyryl cyclic AMP and PGE_1, inhibition by, human platelet secretion and aggregation induced by calcium ionophores, 561
Dichroism, linear, and absorption spectra of some amphibian photoreceptors, 357
Drosophila melanogaster, quantal basis of photoreceptor spectral sensitivity of, 149

E

Erythrocyte suspensions, human, reflection coefficients of permeant molecules in, 251
Ethylenediaminetetraacetic acid and calcium fluxes in dialyzed squid axons, 223
Extracellular recordings, properties of visual cells in lateral eye of *Limulus in situ*, 303
Eye, lateral, of *Limulus in situ*, properties of visual cells in, extracellular recordings, 303
—, scorpion, repetitive strikes in photoreceptor axons of, invertebrate eye structure and tetrodotoxin, 649
Eyes, principal, of jumping spiders, ultraviolet and green receptors in, 193

F

Fast and slow muscles of rabbit, effect of cross-reinnervation on physiological parameters and on properties of myosin and sarcoplasmic reticulum of, 811
Fibers, cardiac Purkinje, multiple effects of calcium antagonists on plateau currents in, 169
—, macaque monkey chorda tympani, response properties of, 781
—, muscle, using barium ions, resolution of potassium ion pump in, 269
—, skinned skeletal muscle, characterization of effects of Mg^{2+} on Ca^{2+}- and Sr^{2+}-activated tension generation of, 427
Flows, passive ion, in superficial pars recta, a component of fluid absorption linked to, 445
Flucutation effects, quantum, in optic nerve of *Rana pipiens*, application to study of, receiver operating characteristic analysis, 583
Fluxes, calcium and EDTA, in dialyzed squid axons, 223
Four-barrier model, ionic selectivity, saturation, and block in sodium channels, 535

G

Gallbladder, routes of nonelectrolyte permeability in, effects of 2,4,6-triaminopyrimidinium (TAP), 117
— tight junction cation-selective channels, blockage of, by 2,4,6-triaminopyrimidinium (TAP), 97
Galleria, moth, microspectrophotometry of rhodopsin and metarhodopsin in, 383
Gating, sodium channel, in lobster axons, selective modification of, by 2,4,6-trinitrophenol, evidence for two inactivation mechanisms, 765
Giant axons, *Myxicola*, magnitude and location of surface charges on, 47
— axons of squid and *Myxicola*, internal resistivity of, resistivity of axoplasm, 139
Green and ultraviolet receptors in principal eyes of jumping spiders, 193

H

Hair cells, responses of, to statocyst rotation, 507
House response, avoidance response, and wind responses of sporangiophore of *Phycomyces*, 67

I

Inactivation mechanisms, two, evidence for, selective modification of sodium channel gating in lobster axons by 2,4,6-trinitrophenol, 765
Intracellular injection of calcium buffers on light adaptation, effects of, in *Limulus* ventral photoreceptors, 489
— recordings from gecko photoreceptors during light and dark adaptation, 617
Invertebrate eye structure and tetrodotoxin, repetitive spikes in photoreceptor axons of scorpion eye, 649
Ionophores, calcium, human platelet secretion and aggregation induced by, inhibition by PGE_1 and dibutyryl cyclic AMP, 561

J

Junction, gallbladder tight, cation-selective channels, blockage of, by 2,4,6-triaminopyrimidinium (TAP), 97

K

Kidney, *Necturus*, proximal tubular reabsorption in, models for coupling of salt and water transport, 671

L

Lateral eye of *Limulus in situ*, properties of visual cells in, extracellular recordings, 303
Light adaptation in *Limulus* ventral photoreceptors, effects of intracellular injection of calcium buffers on, 489
— and dark adaptation, intracellular recordings from gecko photoreceptors during, 617
Light-induced changes of sensitivity in *Limulus* ventral photoreceptors, 473
Light-sensitive swelling of isolated frog rod outer segments as in vitro assay for visual transduction and dark adaptation, 407
Limulus, lateral eye *in situ*, properties of visual cells in, extracellular recordings, 303
— ventral photoreceptors, effects of intracellular injection of calcium buffers on light adaptation in, 489
— ventral photoreceptors, light-induced changes of sensitivity in, 473
—, ventral photoreceptors of, local adaptation in, 823

M

Magnesium, characterization of effects of Mg^{2+} on Ca^{2+}- and Sr^{2+}-activated tension generation of skinned skeletal muscle fibers, 427
Man, platelet secretion and aggregation, induced by calcium ionophores, inhibition by PGE_1 and dibutyryl cyclic AMP, 561
—, red cell suspensions, reflection coefficients of permeant molecules in, 251
Mechanisms, inactivation, evidence for two, selective modification of sodium channel gating in lobster axons by 2,4,6-trinitrophenol, 765
Membrane and acetylcholine receptor in developing rat and chick myotubes, electrophysiological properties of, 327
— resistance change of frog taste cells in response to water and NaCl, 735
Metarhodopsin and rhodopsin in moth *Galleria*, microspectrophotometry of, 383
Microspectrophotometry of rhodopsin and metarhodopsin in the moth *Galleria*, 383
Molecules, permeant, in human red cell suspensions, reflection coefficients of, 251

Monophosphate, dibutyryl cyclic adenosine, and PGE_1, inhibition by, human platelet secretion and aggregation induced by calcium ionophores, 561
Muscle fibers using barium ions, resolution of potassium ion pump in, 269
— fibers, skinned skeletal, characterization of effects of Mg^{2+} on Ca^{2+}- and Sr^{2+}-activated tension generation of, 427
—, frog, activation of phosphorylase in, as determined by contractile activity, 657
—, frog skeletal, sizes of components in, measured by methods of stereology, 31
— stiffness, variation of, with force at increasing speeds of shortening, 287
Muscles of rabbit, fast and slow, effect of cross-reinnervation on physiological parameters and on properties of myosin and sarcoplasmic reticulum of, 811
Muscular contraction, regulation of, distribution of actin control and myosin control in animal kingdom, 1
Myosin control and actin control in animal kingdom, distribution of, regulation of muscular contraction, 1
— and sarcoplasmic reticulum of fast and slow muscles of rabbit, effect of cross-reinnervation on physiological parameters and on properties of, 811
Myotubes, developing rat and chick, electrophysiological properties of membrane and acetylcholine receptor in, 327
Myxicola giant axons, magnitude and location of surface charges on, 47
— and squid, internal resistivity of giant axons of, resistivity of axoplasm, 139

N

Necturus kidney, proximal tubular reabsorption in, models for coupling of salt and water transport, 671
Nerve of *Rana pipiens*, optic, application to study of quantum fluctuation effects in, receiver operating characteristic analysis, 583
Nitrophenol, 2,4,6-tri-, selective modification of sodium channel gating in lobster axons by, evidence for two inactivation mechanisms, 765
Nonelectrolyte permeability in gallbladder, routes of, effects of 2,4,6-triaminopyrimidinium (TAP), 117

O

Optic nerve of *Rana pipiens*, application to study of quantum fluctuation effects in, receiver operating characteristic analysis, 583

P

Pars recta, superficial, a component of fluid absorption linked to passive ion flows in, 445
Passive ion flows in superficial pars recta, a component of fluid absorption linked to, 445
Permeability in gallbladder, routes of nonelectrolyte, effects of 2,4,6-triaminopyrimidinium (TAP), 117
Permeant molecules in human red cell suspensions, reflection coefficients of, 251
Phenol, 2,4,6-trinitro-, selective modification of sodium channel gating in lobster axons by, evidence for two inactivation mechanisms, 765
Phosphatase, adenosine tri-, Na-K-, relation of, to acute changes in renal tubular sodium and potassium transport, 209
Phosphate, dibutyryl cyclic adenosine mono-, and PGE_1, inhibition by, human platelet secretion and aggregation induced by calcium ionophores, 561
Phosphorylase in frog muscle, activation of, as determined by contractile activity, 657
Photoreceptor axons of scorpion eye, repetitive spikes in, invertebrate eye structure and tetrodotoxin, 649
— spectral sensitivity of *Drosophila melanogaster*, quantal basis of, 149
Photoreceptors, some amphibian, absorption spectra and linear dichroism of, 357
—, gecko, intracellular recordings from, during light and dark adaptation, 617
—, *Limulus* ventral, effects of intracellular injection of calcium buffers on light adaptation in, 489
—, *Limulus* ventral, light-induced changes of sensitivity in, 473
— of *Limulus*, ventral, local adaptation in, 823
Phycomyces, sporangiophore of, avoidance response, house response, and wind responses of, 67
Platelet secretion and aggregation, human, induced by calcium ionophores, inhibition by PGE_1 and dibutyryl cyclic AMP, 561
Pore, small circular, access resistance of, 531

Potassium ion pump in muscle fibers using barium ions, resolution of, 269
— and sodium transport, renal tubular, relation of Na-K-ATPase to acute changes in, 209
Potassium-sodium-ATPase, relation of, to acute changes in renal tubular sodium and potassium transport, 209
Principal eyes of jumping spiders, ultraviolet and green receptors in, 193
Prostaglandin E_1 and dibutyryl cyclic AMP, inhibition by, human platelet secretion and aggregation induced by calcium ionophores, 561
Proximal tubular reabsorption in *Necturus* kidney, models for coupling of salt and water transport, 671
Pump, potassium ion, resolution of, in muscle fibers using barium ions, 269
Purkinje fibers, cardiac, multiple effects of calcium antagonists on plateau currents in, 169
Pyrimidinium, 2,4,6-triamino-, (TAP), blockage of gallbladder tight junction cation-selective channels by, 97
—, 2,4,6-triamino-, (TAP), effects of, routes of nonelectrolyte permeability in gallbladder, 117

Q

Quantal basis of photoreceptor spectral sensitivity of *Drosophila melanogaster*, 149
Quantum fluctuation effects in optic nerve of *Rana pipiens*, application to study of, receiver operating characteristic analysis, 583

R

Rana pipiens, application to study of quantum fluctuation effects in optic nerve of, receiver operating characteristic analysis, 583
Receiver operating characteristic analysis, application to study of quantum fluctuation effects in optic nerve of *Rana pipiens*, 583
Red blood cells. *See* Erythrocytes.
Reinnervation, cross-, effect of, on physiological parameters and on properties of myosin and sarcoplasmic reticulum of fast and slow muscles of rabbit, 811
Renal tubular sodium and potassium transport, relation of Na-K-ATPase to acute changes in, 209
Resistance, access, of a small circular pore, 531
—, membrane, change of frog taste cells in response to water and NaCl, 735
Resistivity of axoplasm, internal resistivity of giant axons of squid and *Myxicola*, 139
— of axoplasm, resistivity of extruded squid axoplasm, 133
Reticulum, sarcoplasmic, and myosin, of fast and slow muscles of rabbit, effect of cross-reinnervation on physiological parameters and on properties of, 811
Rhodopsin and metarhodopsin in moth *Galleria*, microspectrophotometry of, 383
Rod outer segments, isolated frog, light-sensitive swelling of, as in vitro assay for visual transduction and dark adaptation, 407
Rotation, statocyst, responses of hair cells to, 507

S

Salt and water transport, models for coupling of, proximal tubular reabsorption in *Necturus* kidney, 671
Sarcoplasmic reticulum and myosin of fast and slow muscles of rabbit, effect of cross-reinnervation on physiological parameters and on properties of, 811
Saturation, selectivity, and block, ionic, in sodium channels, four-barrier model, 535
Segments, isolated frog rod outer, light-sensitive swelling of, as in vitro assay for visual transduction and dark adaptation, 407
Selectivity, saturation, and block, ionic, in sodium channels, four-barrier model, 535
Shortening, variation of muscle stiffness with force at increasing speeds of, 287
Skeletal muscle fibers, skinned, characterization of effects of Mg^{2+} on Ca^{2+}- and Sr^{2+}-activated tension generation of, 427
— muscle, sizes of components in frog, measured by methods of stereology, 31
Skinned skeletal muscle fibers, characterization of effects of Mg^{2+} on Ca^{2+}- and Sr^{2+}-activated tension generation of, 427
Slow and fast muscles of rabbit, effect of cross-reinnervation on physiological parameters and on properties of myosin and sarcoplasmic reticulum of, 811

Sodium channel gating in lobster axons, selective modification of, by 2,4,6-trinitrophenol, evidence for two inactivation mechanisms, 765
— channels, ionic selectivity, saturation, and block in, four-barrier model, 535
— chloride and water, membrane resistance change of frog taste cells in response to, 735
— and potassium transport, renal tubular, relation of Na-K-ATPase to acute changes in, 209
Sodium-potassium-ATPase, relation of, to acute changes in renal tubular sodium and potassium transport, 209
Spectra, absorption, and linear dichroism of some amphibian photoreceptors, 357
Spectral sensitivity of *Drosophila melanogaster*, quantal basis of photoreceptor, 149
Spectrophotometry, micro-, of rhodopsin and metarhodopsin in the moth *Galleria*, 383
Spikes, repetitive, in photoreceptor axons of the scorpion eye, invertebrate eye structure and tetrodotoxin, 649
Sporangiophore of *Phycomyces*, avoidance response, house response, and wind responses of, 67
Statocyst rotation, responses of hair cells to, 507
Stereology, sizes of components in frog skeletal muscle measured by methods of, 31
Strontium, characterization of effects of Mg^{2+} on Ca^{2+}- and Sr^{2+}-activated tension generation of skinned skeletal muscle fibers, 427

T

Taste cells, frog, membrane resistance change of, in response to water and NaCl, 735
Tetraacetic acid, ethylenediamine-, and calcium fluxes in dialyzed squid axons, 223
Tetrodotoxin and invertebrate eye structure, repetitive spikes in photoreceptor axons of scorpion eye, 649
Tight junction cation-selective channels, blockage of gallbladder, by 2,4,6-triamino pyrimidinium (TAP), 97
Transduction, visual, and dark adaptation, light-sensitive swelling of isolated frog rod outer segments as in vitro assay for, 407
Triaminopyrimidinium, 2,4,6-, (TAP), blockage of gallbladder tight junction cation-selective channels by, 97
—, 2,4,6-, (TAP), effects of, routes of nonelectrolyte permeability in gallbladder, 117
Trinitrophenol, 2,4,6-, selective modification of sodium channel gating in lobster axons by, evidence for two inactivation mechanisms, 765
Triphosphatase, adenosine, Na-K-, relation of, to acute changes in renal tubular sodium and potassium transport, 209
Tubular, proximal, reabsorption in *Necturus* kidney, models for coupling of salt and water transport, 671
— sodium and potassium transport, renal, relation of Na-K-ATPase to acute changes in, 209

U

Ultraviolet and green receptors in principal eyes of jumping spiders, 193

V

Ventral photoreceptors, *Limulus*, effects of intracellular injection of calcium buffers on light adaptation in, 489
— photoreceptors, *Limulus*, light-induced changes of sensitivity in, 473
— photoreceptors of *Limulus*, local adaptation in, 823
Visual cells in lateral eye of *Limulus in situ*, properties of, extracellular recordings, 303
— transduction and dark adaptation, light-sensitive swelling of isolated frog rod outer segments as in vitro assay for, 407

W

Water and NaCl, membrane resistance change of frog taste cells in response to, 735
— and salt transport, models for coupling of, proximal tubular reabsorption in *Necturus* kidney, 671
Wind responses, avoidance response, and house response of sporangiophore of *Phycomyces*, 67

THE JOURNAL OF GENERAL PHYSIOLOGY

CONTENTS OF VOLUME 66

NUMBER 1, JULY, 1975

1 WILLIAM LEHMAN and ANDREW G. SZENT-GYÖRGYI. Regulation of muscular contraction. Distribution of actin control and myosin control in the animal kingdom

31 BERT A. MOBLEY and BRENDA R. EISENBERG. Sizes of components in frog skeletal muscle measured by methods of stereology

47 TED BEGENISICH. Magnitude and location of surface charges on *Myxicola* giant axons

67 R. J. COHEN, Y. N. JAN, J. MATRICON, and M. DELBRÜCK. Avoidance response, house response, and wind responses of the sporangiophore of *Phycomyces*

97 JULIO H. MORENO. Blockage of gallbladder tight junction cation-selective channels by 2,4,6-triaminopyrimidinium (TAP)

117 JULIO H. MORENO. Routes of nonelectrolyte permeability in gallbladder. Effects of 2,4,6-triaminopyrimidinium (TAP)

NUMBER 2, AUGUST, 1975

133 K. S. COLE. Resistivity of axoplasm. I. Resistivity of extruded squid axoplasm

139 DAVID O. CARPENTER, MARTIN M. HOVEY, and ANTHONY F. BAK. Resistivity of axoplasm. II. Internal resistivity of giant axons of squid and *Myxicola*

149 CHUN-FANG WU and WILLIAM L. PAK. Quantal basis of photoreceptor spectral sensitivity of *Drosophila melanogaster*

169 ROBERT S. KASS and RICHARD W. TSIEN. Multiple effects of calcium antagonists on plateau currents in cardiac Purkinje fibers

193 ROBERT D. DEVOE. Ultraviolet and green receptors in principal eyes of jumping spiders

209 ADRIAN I. KATZ and MARSHALL D. LINDHEIMER. Relation of Na-K-ATPase to acute changes in renal tubular sodium and potassium transport

223 F. J. BRINLEY, JR., S. G. SPANGLER, and L. J. MULLINS. Calcium and EDTA fluxes in dialyzed squid axons

251 JEFFREY D. OWEN and EDWARD M. EYRING. Reflection coefficients of permeant molecules in human red cell suspensions

NUMBER 3, SEPTEMBER, 1975

ii ERRATUM

269 R. A. SJODIN and OLGA ORTIZ. Resolution of the potassium ion pump in muscle fibers using barium ions

287 FRED J. JULIAN and MICHAEL R. SOLLINS. Variation of muscle stiffness with force at increasing speeds of shortening

303 EHUD KAPLAN and ROBERT B. BARLOW, JR. Properties of visual cells in the lateral eye of *Limulus in situ*. Extracellular recordings

327 AILEEN K. RITCHIE and DOUGLAS M. FAMBROUGH. Electrophysiological properties of the membrane and acetylcholine receptor in developing rat and chick myotubes

357 FERENC I. HÁROSI. Absorption spectra and linear dichroism of some amphibian photoreceptors

383 LEONARD J. GOLDMAN, STEPHEN N. BARNES, and TIMOTHY H. GOLDSMITH. Microspectrophotometry of rhodopsin and metarhodopsin in the moth *Galleria*

NUMBER 4, OCTOBER 1975

407 DERIC BOWNDS and ANN E. BRODIE. Light-sensitive swelling of isolated frog rod outer segments as an in vitro assay for visual transduction and dark adaptation

427 S. K. BOLITHO DONALDSON and W. GLENN L. KERRICK. Characterization of the effects of Mg^{2+} on Ca^{2+}- and Sr^{2+}-activated tension generation of skinned skeletal muscle fibers

445 JAMES A. SCHAFER, CLIFFORD S. PATLAK, and THOMAS E. ANDREOLI. A component of fluid absorption linked to passive ion flows in the superficial pars recta

473 J. E. LISMAN and J. E. BROWN. Light-induced changes of sensitivity in *Limulus* ventral photoreceptors

489 J. E. LISMAN and J. E. BROWN. Effects of intracellular injection of calcium buffers on light adaptation in *Limulus* ventral photoreceptors

507 DANIEL L. ALKON. Responses of hair cells to statocyst rotation

531 LETTER TO THE EDITOR

JAMES E. HALL. Access resistance of a small circular pore

NUMBER 5, NOVEMBER, 1975

535 BERTIL HILLE. Ionic selectivity, saturation, and block in sodium channels. A four-barrier model

561 M. B. FEINSTEIN and C. FRASER. Human platelet secretion and aggregation induced by calcium ionophores. Inhibition by PGE_1 and dibutyryl cyclic AMP

583 THEODORE E. COHN, DANIEL G. GREEN, and WILSON P. TANNER, JR. Receiver operating characteristic analysis. Application to the study of quantum fluctuation effects in optic nerve of *Rana pipiens*

617 JOCHEN KLEINSCHMIDT and JOHN E. DOWLING. Intracellular recordings from gecko photoreceptors during light and dark adaptation

649 CARLOS BELMONTE and L. J. STENSAAS. Repetitive spikes in photoreceptor axons of the scorpion eye. Invertebrate eye structure and tetrodotoxin

657 W. F. H. M. MOMMAERTS, K. VEGH, and E. HOMSHER. Activation of phosphorylase in frog muscle as determined by contractile activity

NUMBER 6, DECEMBER, 1975

671 HENRY SACKIN and EMILE L. BOULPAEP. Models for coupling of salt and water transport. Proximal tubular reabsorption in *Necturus* kidney

735 TOSHIHIDE SATO and LLOYD M. BEIDLER. Membrane resistance change of the frog taste cells in response to water and NaCl

765 G. S. OXFORD and J. P. POOLER. Selective modification of sodium channel gating in lobster axons by 2,4,6-trinitrophenol. Evidence for two inactivation mechanisms

781 MASAYASU SATO, HISASHI OGAWA, and SATORU YAMASHITA. Response properties of macaque monkey chorda tympani fibers

811 F. A. SRÉTER, A. R. LUFF, and J. GERGELY. Effect of cross-reinnervation on physiological parameters and on properties of myosin and sarcoplasmic reticulum of fast and slow muscles of the rabbit

823 ALAN FEIN and J. SHERWOOD CHARLTON. Local adaptation in the ventral photoreceptors of *Limulus*

1-22*a* ABSTRACTS OF PAPERS PRESENTED AT THE TWENTY-NINTH ANNUAL MEETING OF THE SOCIETY OF GENERAL PHYSIOLOGISTS
